-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of invention I in the reply filed on 6/13/07 is acknowledged. The traversal is on the ground(s) that the skate of claims 15-24 includes all the wheel structure of claims 1-14. This is not found persuasive because the spring structure is not recited in the skate claims 15-24.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 15-24 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention II, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 6/13/07.

3. This application contains claims 15-24 drawn to an invention nonelected with traverse in the reply filed on 6/13/07. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3618

5. Claims 1-4, 8-10, and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Madden et al. (US 2,951,523 A).
6. Madden et al. discloses a wheel comprising a rim 15 and a rubber tire including a tread 12 and a curved support element 16 which extends between bearing elements 21 on either side of the rim, and a plurality of support elements 18, as shown in figure 2.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 5-7 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Madden (US 2,951,523 A) and in further view of Alexander (US 2,912,032 A).

Madden et al. does not disclose the tire as having a soft inner layer or the support elements as being spring wires spaced around the circumference of the wheel. Alexander does disclose a wheel comprising a tread layer 32 surrounding soft rubber sponge layer 42 and clamped support layer 10 and including spring elements 16, as shown in figures 1-2. It would have been obvious to one having ordinary skill in the art at the time of the invention to have provided the wheel of Madden et al. with the soft layer and spring elements of Alexander in order to provide increased cushioning.

Response to Arguments

9. Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey J. Restifo whose telephone number is (571) 272-6697. The examiner can normally be reached on M-F 10-7.
